CookCountyAssessor.com → Data

The screenshot shows the header of the Cook County Assessor's Office website. The logo on the left features a stylized house icon with the text "COOK COUNTY ASSESSOR'S OFFICE". To the right of the logo are navigation links: "HOW IT WORKS", "EXEMPTIONS", "APPEALS", "DATA", "SEARCH", and "ALL FORMS & TOOLS". The "DATA" link is highlighted with an orange background, and a dropdown menu is open, listing the following items:

- Community Data Overview
- COVID-19 Adjustments
- Valuation Reports
- Market Analyst Day 2019
- Market Analyst Day 2020-2021
- Property Tax Rate Simulator Tool
- GitHub Code And Models
- CCAO Datasets On Cook County Data Portal
- Data Dashboards

```
# PIN geometries only exist for 10-digit PINs, so we'll need to truncate our
# existing Wheeling PINs
wh_pin10s <- unique(substr(wh_pins$pin, 1, 10))

# The geometry is stored in the database as simple text, so we need to convert
# it to the correct type using sf
wh_pins_geo <- lookup_pin10_geometry(year = 2020, pin10 = wh_pin10s)
wh_pins_geo <- wh_pins_geo %>%
  st_as_sf(wkt = "geometry", crs = 4326)

# We'll also attach the first class code from each PIN14 to each PIN10 geometry
# and group them into broad buckets. This is just to help our visualization
wh_pins_geo <- wh_pins_geo %>%
  left_join(
    wh_pins %>%
      mutate(pin10 = substr(pin, 1, 10)) %>%
      group_by(pin10) %>%
      summarize(class = first(class)),
    by = "pin10"
  ) %>%
  mutate(
    major_class = substr(class, 1, 1),
    major_class_fct = recode_factor(
      major_class,
      "2" = "2 - Residential",
      "3" = "3 & 5 - Commercial",
      "5" = "3 & 5 - Commercial",
      "0" = "Other", "1" = "Other", "6" = "Other", "7" = "Other"
    )
  )
